## *After your treatment*

- Treatment with the 'BeautyTeck' Plasma Pen, can result in some reactions including redness and swelling. These reactions can last for up to ten days.
  - To minimise the risk of infection or undesired effects, the instructions specific to your treatment must be followed.
  - If you have any concerns please consult your beauty Practitioner.
  - Keep the area treated clean. Apply the appropriate antiseptic product twice a day. Any swelling should subside within 5 days from the treatment.
  - In the unlikely case an infection arises or the swelling has not subsided within 5 days contact your doctor.
  - Avoid sun exposure, UV light, freezing temperatures and saunas for ten days after treatment. Apply total sunscreen up to 3 months after the last treatment and void direct sun exposure. Failure to do so can increase risks of hyperpigmentation
  - Avoid the use of any plasters on the area treated.
  - Do not use any coverup make up or any makeup of any kind up until the scabs (which may form) have fallen off by themselves and the area has recovered fully
  - If you have had treatment around the eyes you must wear sunglasses outside for 10 days following the treatment.
  - Avoid exercise, smoking and alcohol consumption for one day following treatment and extreme sports until the part treated has fully recovered.
  - Do not pick the any scabs with may follow the aesthetic treatment.
- *Use total sunblock for at least 3 months after the last treatment and avoid direct sun exposure for that period.*
